PROJECTS

RESALA

Nov/21/22 - Nov/26/22

A website to buy and sell used laptops.

[Live website](#) | [Client-side](#) | [Server-side](#)

- Key features:**
- Payment Gateway has been implemented for users to securely pay for their products. Strip.js has been used to add this functionality.
 - Dashboard panel has been included, where based on a user role certain routes and options are displayed.
 - Uploading pictures directly from local storage functionality has been included using third-party image hosting services like imgBB.

Technologies: ReactJS, React-router-dom, NodeJS, ExpressJS, MongoDB, Firebase Authentication, JWT, Stripe, TailwindCSS, Daisy UI, imgbb, SwiperJS, React Strip, React-hot-toast, TanStack Query, React-icons.

GenOx

Oct/25/22 - Oct/27/22

A website offering paid courses.

[Live website](#) | [Client-side](#) | [Server-side](#)

- Key features:**
- Single page application functionality implemented to make the user experience smooth with the help of React Router Dom
 - Firebase Authentication implemented to allow users to sign in using email and google accounts.
 - Download to pdf functionality has been included with the help of React to PDF npm package.

Technologies: ReactJS, NodeJS, Express, MongoDB, React Router Dom, firebase Authentication, React-toastify, React icons, TailwindCSS, react-to-pdf.

Paradise

Nov/5/22 - Nov/8/22

A website of an individual photographer providing services.

[Live website](#) | [Client-side](#) | [Server-side](#)

- Key features:**
- Functionality for users to add, delete and modify reviews has been implemented using MongoDB CRUD operation.
 - Private Routes are added in the front end to prevent unauthorized user access. API
 - Routes are secured using JSON web tokens (JWT) to prevent unauthorized users from accessing the API routes.

Technologies: ReactJS, React-router-dom, NodeJS, ExpressJS, MongoDB, TailwindCSS, Firebase Authentication, react-photo-view, React-toastify.
